

Smarter Communities. Smarter Savings.™

Your Home Improvement Platform

LAUNCHING MARCH 16TH 2017

Are you planning a home improvement project in the near future?

Wish there was a way to know if your neighbors were getting ready to do the same home improvement project so you could group them together to get the very best price and save time?

LinkingSpot will group your project with similar projects in your neighborhood in order to get you and your neighbors the lowest quotes from quality contractors!

HERE'S AN EXAMPLE OF HOW IT WORKS

Need to power wash the siding on your home? Imagine the power you would have in grouping that project together with your neighbors. Because LinkingSpot contractors are able to save money themselves by reducing their overall costs, they can pass along those savings to their customers which in turn means LinkingSpot users pay less for home improvement projects. This is the power of group buying.

These savings apply to almost every home improvement project including: gutter cleaning, house painting, grass cutting, tree removal, air conditioning repair and replacement, roofing, siding, handyman services, etc. .

And the best part? **LinkingSpot** is **FREE** for homeowners! So stop thinking and get linking with **LinkingSpot**!!!!

Smarter communities. Smarter Savings.
